Re: Ex Parte Reply Comments, Wave 4 800 MHz Rebanding – FCC Docket 02-55

Dear Ms. Dortch,

The organizers of the recent Wave 4 Public Safety Rebanding Summit that took place in Brook Park, Ohio on June 7, 2007, as well as the undersigned (RPC Regions 30, 33, and 55) wish to provide the attached framework for 800 MHz rebanding in Canadian Border Regions 2, 3, and 4, and request that the FCC place this framework on Public Notice for comment.

This proposed approach represents the best consensus that has been obtained to date through the many roundtable discussions on this issue with public stakeholders. While this proposal does not contain all the details, and may not represent the final solution, placing it on public notice would allow an opportunity for further discussion of these details, and for alternative strategies and/or options to be presented. In particular, one item that many parties wish the FCC to request comment on is the possibility for licensees to narrowband their 25-kHz channels to 12.5-kHz as an integral part of the rebanding process

Sincerely,

_____/S/_____
